

Does “Just-In-Case” Inventory Have You Going Around in Circles?

Equipping your cath lab with appropriate quantities of the ideal types of devices and supplies is a never-ending challenge.

A number of factors influence how rapidly stock is depleted and what remains on shelves untouched. Carrying too much inventory can lead to expired stock that takes up valuable space and unnecessarily drains your budget. The cost of those unused materials goes beyond depleting the cath lab budget. It also costs you valuable staff time in terms of the effort needed to assess, select, order, and maintain essential items.

When inventory becomes a maze of choices and complicates an already demanding and complex environment - you need to introduce processes that bring greater structure and efficiency to your lab's inventory and supply chain management.

To improve your Cath Lab operations, you need the tool that helps standardize your purchasing and inventory policies and aids in your decision making. ACC's Cardiac Cath Lab Accreditation is that tool.

Results of Accreditation

ACC's Cardiac Cath Lab Accreditation provides the framework to fine-tune your facilities processes and workflows. The guidance and shared practices that are built-in to the accreditation tool contribute to more precise care coordination and help you:

- ✓ Validate required inventory before the start of a case
- ✓ Define the process for inventory management and the steps for requesting new products
- ✓ Store all of your processes and policies in an easily accessible online platform

Pairing Cardiac Cath Lab Accreditation with your CathPCI Registry® or CV ASC Registry Suite™ metrics drives better outcomes, enhances patient care, increases satisfaction, and delivers greater ROI.

Cardiac CathLab Accreditation

Gain Greater Visibility with Cardiac Cath Lab Accreditation

Cardiac Cath Lab Accreditation can help your team address concerns at every decision point from determining useful and safe inventory storage procedures to documenting lab policies to assessing your lab's financial stability in light of value-based purchasing and costs associated with reimbursement for supplies utilized in patient procedures.

The Hidden Costs of "Just-in-Case" Inventory

- ✓ **Hard Cost:** The health care supply chain loses inventory to shrinkage, product recall, and product expiration on a daily basis. Estimates suggest that **7% to 10% of products are likely to expire** on the shelf.
- ✓ **Soft Cost:** Nurses may be spending as much of **30% of their time trying to locate** requested or required products and supplies.
- ✓ **Decreased reimbursement** may be a result of unintentional charge capture error(s) - creating up to 12% in transaction inaccuracies.
- ✓ Maintaining a "Just-in-Case" approach to inventory requires an **additional 25% to 50% labor** effort.
- ✓ **Excess inventory** may represent as much as **60% of total** onsite inventory with **10-15%** of surplus at or **beyond expiration**.
- ✓ **Estimates** associated with "Just-in-Case" inventory practices **point to poor performance**.
- ✓ **A more efficient supply chain** enables cath labs to better manage high-value products and free up staff to focus on patient care.

What Direction is Your Cath Lab Headed?

Are your policies in line with the cost savings that can be achieved through the smart and practical approach to resource utilization and patient safety? ACC's Cardiac Cath Lab Accreditation can help you make more informed decisions, so you avoid unintended procedure cancellations and delays. Get the trusted advice, tools, and resources that will help you align all the essential elements associated with evidence-based care.

Get Where You're Meant To Be!

While today's challenge may be securing and tracking inventory or the use of correct charge codes, tomorrow's may be more accurate utilization forecasting or compliance with recalls and new state regulations. It's too easy to ignore established workflows and long-term goals when not guided by the best tools, best practices, and most current medical therapies.

Ask us how ACC Accreditation Services can help you create a roadmap that leads to optimal results.
