**FACILITY** Receives ACC Advanced Heart Failure Accreditation  
*FACILITY provides necessary care, resources to heart failure patients*

**DATELINE (Month xx, 20XX)** — The American College of Cardiology (ACC) has recognized **FACILITY NAME** for its demonstrated expertise and commitment in treating patients with heart failure. **FACILITY NAME** was awarded Advanced Heart Failure Accreditation in **MONTH** based on rigorous onsite review of the staff’s ability to evaluate, diagnose and treat patients with heart failure through pre-hospital care, early stabilization, acute care, transitional care, clinical quality measures and more.

Heart failure is a condition where the heart is unable to pump enough blood to meet the body’s needs for blood and oxygen. Facilities earning Advanced Heart Failure Accreditation not only demonstrate management of advanced heart failure, but also provide heart transplant and mechanical circulatory support and meet other specific criteria for the Advanced designation.

Hospitals that employ an evidence-based, protocol-driven and systematic approach to managing heart failure have been able to reduce time to treatment, and are able to identify and predict high-risk patients while also reducing length-of-stay and hospital readmissions.

“**FACILITY NAME** has demonstrated its commitment to providing **COMMUNITY NAME** with excellent heart care,” said Phillip D. Levy, MD, FACC, chair of the ACC Accreditation Management Board. “ACC Accreditation Services is proud to award **FACILITY NAME** with Advanced Heart Failure Accreditation.”

Hospitals receiving Advanced Heart Failure Accreditation from the ACC must take part in a multi-faceted clinical process that involves: completing a gap analysis; examining variances of care, developing an action plan; a rigorous onsite review; and monitoring for sustained success. Improved methods and strategies of caring for patients include streamlining processes, implementing of guidelines and standards, and adopting best practices in the precise care of heart failure patients. Facilities that achieve accreditation meet or exceed an array of stringent criteria and have organized a team of doctors, nurses, clinicians, and other administrative staff that earnestly support the efforts leading to better patient education, improved patient outcomes, and more effective and efficient disease control.

### **About the American College of Cardiology**

The American College of Cardiology envisions a world where innovation and knowledge optimize cardiovascular care and outcomes. As the professional home for the entire cardiovascular care team, the mission of the College and its more than 52,000 members is to transform cardiovascular care and to improve heart health. The ACC bestows credentials upon cardiovascular professionals who meet stringent qualifications and leads in the formation of health policy, standards and guidelines. The College also provides professional medical education, disseminates cardiovascular research through its world-renowned *JACC Journals*, operates national registries to measure and improve care, and offers cardiovascular accreditation to hospitals and institutions.
