

Elevate the Power of System-Wide Performance

ACC
Accreditation
Services™

American College of Cardiology®

With ACC at your side,

guiding your multi-disciplinary teams in unison through the Accreditation process, each of your facilities will be able to identify the numerous financial, operational,

Unify Your Approach to Accreditation

Systems of care are in a truly unique position to transform the outcomes of thousands of CV patients. Shared clinical objectives can lead to sustainable, budget-minded practices when each of the participating facilities within a system acquire the discipline it takes to operate in an environment that advocates performance improvement.

ACC Accreditation Services understands how to scale the adoption of process improvement techniques across multiple facilities and CV services lines.

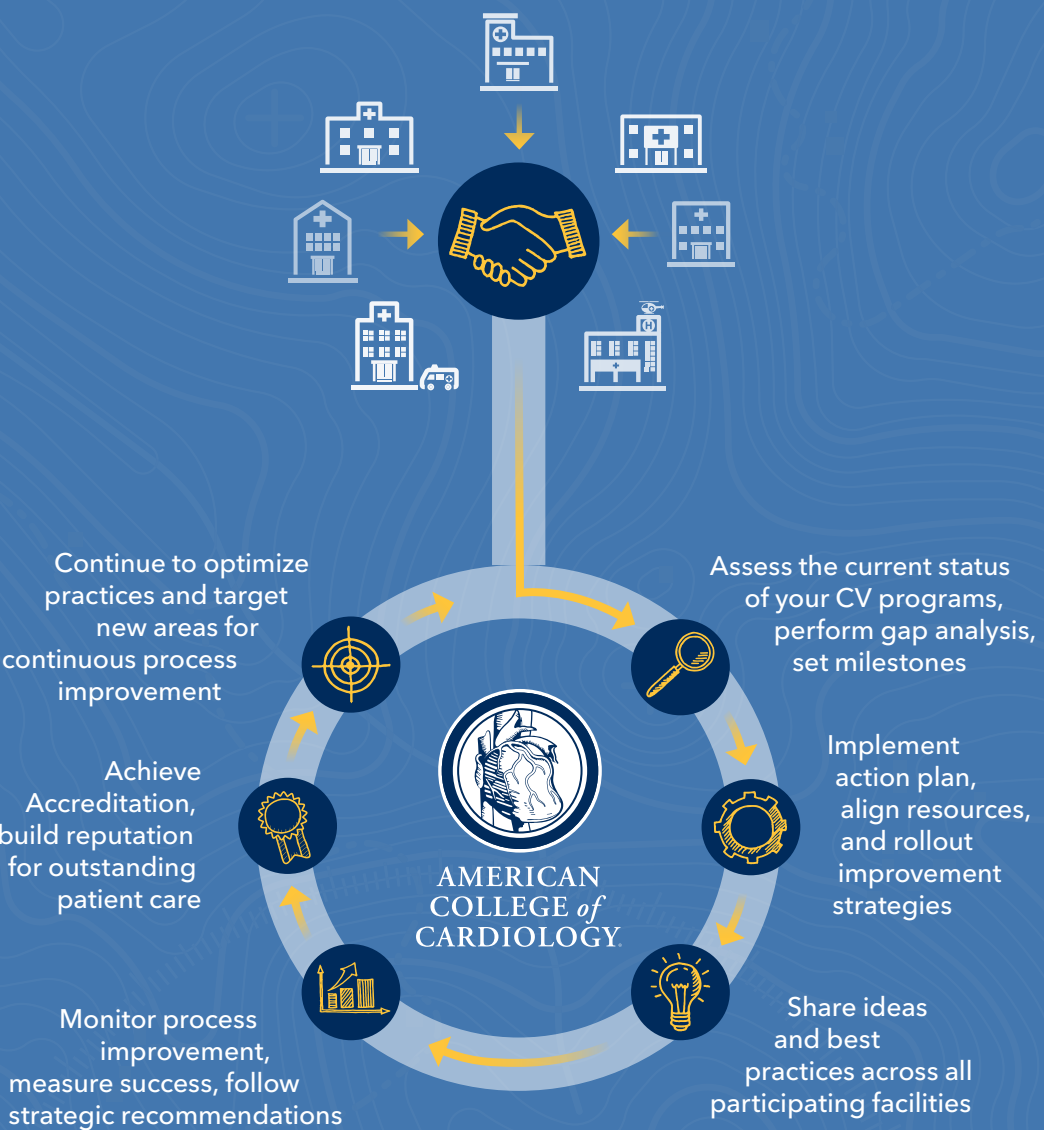

While shared system goals are established and supported, each participating facility is able to implement site-specific plans that are designed to address their most critical financial, quality, and patient care needs. This allows each hospital to better identify specific gaps or variations in care.

Through Accreditation a system can also direct its facilities to share best practices with their system counterparts and with outside facilities that have successfully tackled similar clinical challenges.

Building communities of excellence is one of the driving forces of Accreditation and one of the surest ways to establish an agile strategy that supports integrated and results-oriented decision making.

Create a Better Roadmap for Sustainable Process Improvement.

Partner with ACC Accreditation Services to begin the Accreditation journey

Benefits of System-Wide Accreditation

The benefits of Accreditation are significant and are repeatedly demonstrated to lead to better operating margins per patient. In addition to reducing readmissions and associated costs, systems have found that Accreditation:

Improves patient outcomes and decreases variation in care across all participating entities

- Provides an opportunity for the highest performing hospitals to share their best practices within the system

Reinforces corporate commitment and accountability

- Promotes group awareness of objectives and capabilities; diminishes barriers within the system
- Oversight and management of multiple hospitals pursuing Accreditation independently can be disjointed and difficult to coordinate - leading to stray outliers and irregular adherence to strategic initiatives and performance goals

Spotlights each facility's performance metrics

- Provides greater opportunity to benchmark facilities within a system as they simultaneously pursue process improvement

Ask our Accreditation team about the exclusive training platform and **pricing discounts available** for system-wide Accreditation programs and how ACC can advance strategies for enterprise-wide performance improvement.
