- Saved regimens are automatically date and time stamped
- Select English or Spanish from the drop-down box
- Customize **MEDACTIONPLAN™** to meet each patient's individual needs
- Email or export schedules directly to patient

My Daily Schedule™—Choose letter, large-print and/or wallet-size. Give patients a visual reminder of which medications to take, how much to take, and at what time.

Special Instructions—Dietary considerations for each medication. Instructions can be edited.

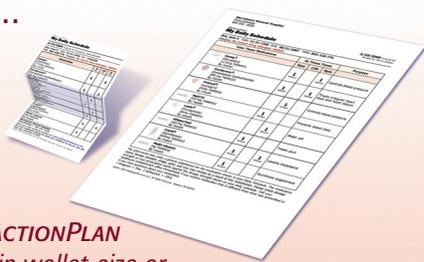

Weekly Med Checklist—Choose from weekly or monthly formats. Patients keep track of what they take and when.

Weekly Health Record—Chart used by patients to record their vital signs, such as blood pressure, temperature, weight, etc.

Appointment Calendar—Remind patients of upcoming visits.

Patient Education Tools—Improve understanding of medical issues.

and more...

“MedActionPlan is an incredible program, especially for my heart failure patients with complex medication regimens. The patients are so grateful for the printed material that allows them to fully understand and be able to follow their daily medication regimen with ease.”

Vicky Ebone, APRN-BC
Cardiothoracic Transplant Coordinator
Bay Shore Medical Center—Pasadena, TX

“MedActionPlan.com has been so beneficial for my heart failure patients. It allows them to remain independent, and to be able to truly understand how to take their meds, what the meds are indicated for, and assists them to partner in their care.”

Lenore Blank MSN APN, C
Administrative Manager
Heart Failure and Pulmonary Hypertension Program
Hackensack University Medical Center

The pharmacist may make a generic substitution for the medication shown in your Daily Schedule. The medication name, dosage strength, shape, color, and size may change as a result of this substitution. Please check dosage strength on your prescription bottle against the dosage strength shown on your daily schedule. Call your healthcare professional's office immediately if you receive medication that is different from what was prescribed or if you have questions about your medication.
1 teaspoon = 5mL, 1 tablespoon = 15mL

Personalized Med Schedule

- Help meet Joint Commission national patient safety goals
- Promote patient understanding and adherence
- Improve compliance and reduce medication errors
- Empower patients to self-manage their care
- Print in English or Spanish
- HIPAA compliant

WWW.MEDACTIONPLAN.COM™

What is MEDACTIONPLAN™?

MEDACTIONPLAN for Heart Failure is a free web-based program that allows healthcare professionals to customize, document, and print med schedules for their patients, empowering them to become active partners in their healthcare.

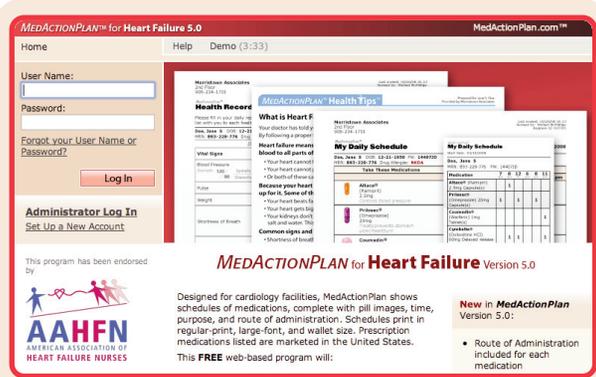

Medication Schedules and **Checklists** help with adherence to medical therapy

Patient Education Topics use patient friendly language and illustrations to improve understanding

Insulin Chart with Sliding Scale and **Health Record** aid in self-management of care

Schedule by Time, Wallet-Size, Large-Print and other formats meet individual needs

HIPAA compliant so medical information is safe and secure

Key features of Version 5.0 include:

- NEW Taper schedule**—quickly create complex tapering schedules
- NEW Anticoagulation schedule**—prevent dosing errors
- NEW Flexible new dosing options**, including fractional dosing
- NEW Route of Administration** for each medication
- NEW Improved printing and new schedule layout options**

Select Medications

Add medications with one of the following methods:

Build on existing regimens to save time

- Default Regimens—can be set up by your local administrator to reflect the medications, doses, and times commonly used by your facility
- Saved Patient Regimens—can be recalled and updated

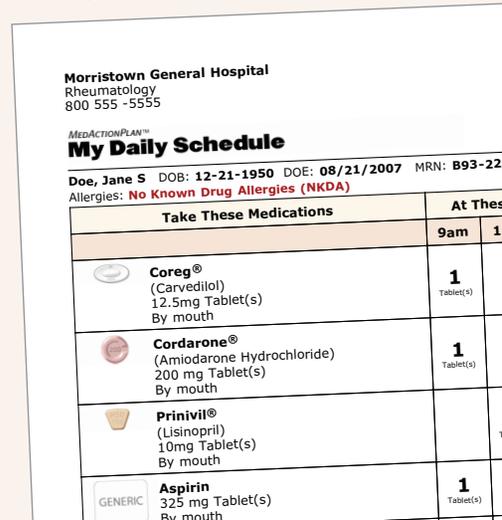

Add medications one-at-a-time

- Quick Find—search by typing in the drug name and click on the medication when it appears
- Add a medication not found in the database

“MedActionPlan.com has made teaching complicated medicine regimens so much easier to share with my patients. Their compliance has improved because of it, and updating is remarkably fast and user-friendly. I highly recommend using it for any patient population—it's concise, easy to read and my patients request it over other medicine schedule teaching aids we have used in our Heart Failure/Heart Transplant program.”

Robin, Nurse Practitioner
VA Medical Center

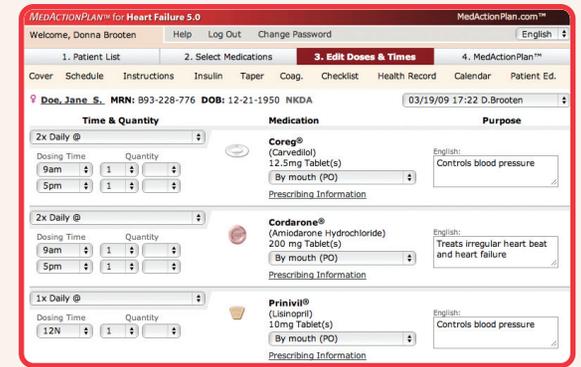

Create a MEDACTIONPLAN™ in English or Spanish

Set Doses and Times

Multiple medication time slots can be set for each regimen:

- Select daily medication times—up to 6 time slots
- Select quantity to be taken at each time
- Non-Daily option is used for medications with a special use application (e.g. “take one tablet every Monday, Wednesday, and Friday with breakfast”)
