

NCDR
eReports™
STATES

AMERICAN COLLEGE of CARDIOLOGY®

DRIVING QUALITY IMPROVEMENT AT A REGIONAL LEVEL

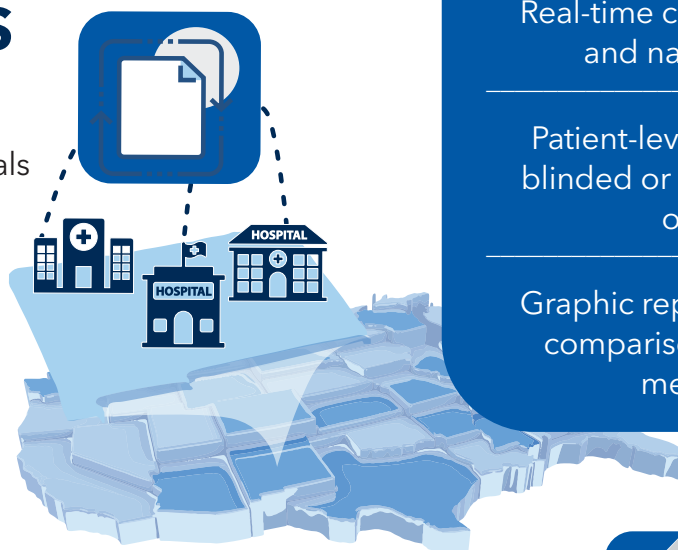

The **NCDR eReports™ States** dashboard is an easy-to-use tool with customizable data points you can use to target in your quality initiatives. Access data quickly and securely through our clinical data visualizer for identifying areas for improvement across your state. Analyze hospital performance data with a customizable view of information that measures the quality of hospitals in your jurisdiction.

HOW IT WORKS

MONITOR

Data Collected at Local Hospitals in Your State or Region

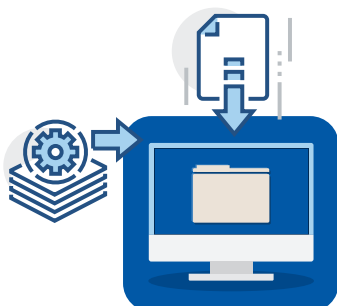

Input data through the NCDR Web Tool or software vendor

CONNECT

Data Sent to NCDR

Data is Aggregated, Benchmarked and Checked for Quality at NCDR

COMPARE

NCDR Data Populates Dashboard

IMPROVE

State Authorities Leverage Data to Improve CV Care in State or Region

BENEFITS

Hospital performance comparisons

Quick and easy access to granular data

Customizable timeframes, measure sets and regions of interest

Real-time comparisons to regional and national benchmarks

Patient-level drill downs to either blinded or identifiable data based on your needs

Graphic representation of hospital comparisons based on specific metrics over time
