

# NCDR eReports™

AMERICAN COLLEGE of CARDIOLOGY®

## FASTER INSIGHTS FOR YOUR HEALTH SYSTEM

**Turnkey Solution** automatically aggregates data across your entire system and is refreshed weekly

**Custom Reporting** tracks system-specific performance on a consolidated dashboard and can feed your own analytic systems. Select your preferred metrics, time frames, and data format.

**Most comprehensive** registry data set in the CV industry: Benchmarks are based on **>50 million patient records**

**Compare your performance** against national benchmarks to target outliers for improvement

**Visualize your CV outcomes** and detailed line items to support the mission of better patient care

**View actionable data** at your fingertips

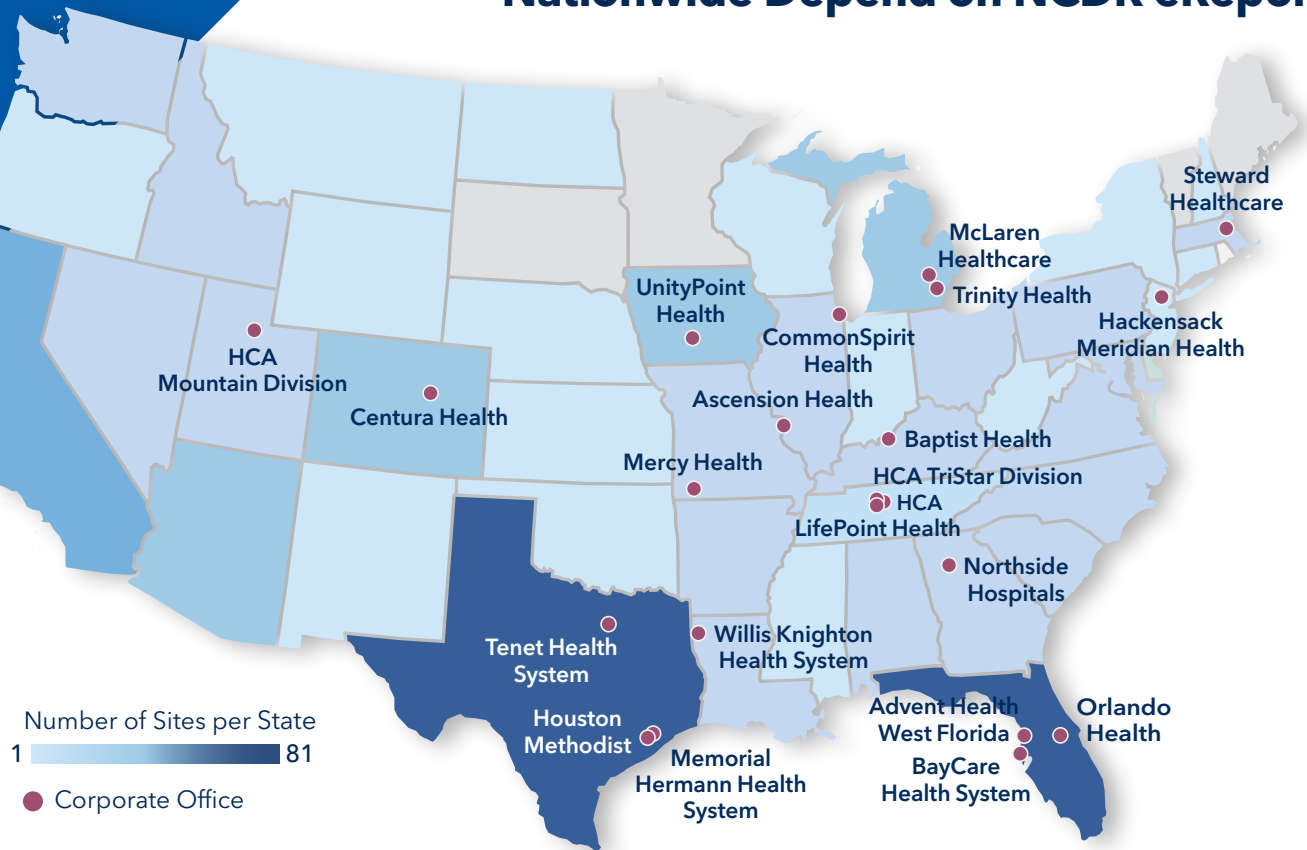

**Inform your system leaders** about cumulative NCDR results and trends

**Understand** each provider's performance with the Professional Level Dashboard

For more information on how NCDR eReports can help you foster a culture of quality in your facilities, email [NCDRCorpSolutions@acc.org](mailto:NCDRCorpSolutions@acc.org) or visit [CVQuality.acc.org/eReports](https://www.CVQuality.acc.org/eReports) for more information on all of the NCDR eReports products.

# Hundreds of Hospitals and Health Systems Nationwide Depend on NCDR eReports

## LOWER COSTS AND IMPROVE PATIENT SAFETY BY LOWERING RATE OF BLEEDING EVENTS

A major health system recognized the opportunity for improvement in PCI-related bleeding events. NCDR eReports showed the system needed a three-fold improvement to reach the NCDR 90<sup>th</sup> percentile benchmark. This patient safety effort coincided with a push to reduce the \$8M annual spend on an overused anticoagulation medication that was worsening outcomes.

### Using NCDR eReports and other quality improvement tools to support system-wide improvements:

- **Broadened assessment of bleeding risk** to all patients undergoing PCI to tailor treatment
- **Addressed overuse of bivalirudin** in low-risk patients
- **Lowered cost** per PCI case by promoting radial access
- **Reduced acute kidney injury** from contrast material used in PCI procedures

*"NCDR eReports allows an easy approach for all of our system's hospitals to benchmark against others in our system."*

Jim Vandewarker MSN, RN, Director, Clinical Transformation Cardiovascular Services at Trinity Health

*"NCDR eReports gives us the ability to look at it from a system perspective and hone in on individual facilities whenever we needed to. If you're looking at multiple hospitals and tracking improvements, eReports are of great benefit."*

Mary Osborne RN MBA MSN CPHQ, Director, National Cardiovascular Service Line at CommonSpirit
