Daily Nursing Documentation for Heart Failure Patients

1. Read physician notes daily - know the plan of care
2. Document "teach back" every shift under "Adult Education" in I-View: make sure to document under every category
3. Initiate "High Risk of Readmission" IPOC (if applicable)
4. Strict I/O have to be documented every shift
5. Standing weight to be obtained and documented every day
6. Pt/Family to view education on patient education channel via computer and documented in I-View

Before Discharge:

1. "Depart" Heart Failure Tab – filled out completely
2. Make sure 7-day f/u is on Depart paperwork
3. Pharmacy and Dietician to educate before discharge
