

Resources Used for Identifying Heart Failure Patients

Step 1

Daily list generated from Data warehouse and/or EMR team, to include the follow information:

- Patient ID
- Unit
- Admission Date
- Previous HF Flag
- Last Discharge
- Diuretic Flag
- Diuretic Start
 - BNP Flag
 - BNP Value

We use the diuretic order
BNP \geq 500
Previous discharge with HF diagnosis

Step 2

The list of patients generated from this list is manually reviewed daily.

We created an EPIC Shared patient list and populate the list daily. (See below)

Patient Lists
